

SUMMARY

Solutions Engineer Intern (AI Apps) at Microsoft and Data Science graduate from Thomas More with hands-on experience turning customer problems into **Azure AI** App demos, technical validations, and solution paths. Skilled in **Azure**, **AzureML/Foundry**, **pre-sales**, AI/ML, Python, TypeScript, React, SQL, and DevOps. Fast-learning, **customer-focused**, and strong at **bridging technical depth with business impact**.

EXPERIENCE

2/2026 – Present	Solutions Engineer Intern (AI Apps / Data)	Microsoft, Zaventem
Azure, AzureML, GHCP, Python, Foundry, Bicep, MCP	- Built reusable Azure AI solution accelerators across AI Search, Foundry, GitHub Copilot, MCP, realtime speech, and agentic AI, turning enterprise requirements into validated demos and deployable prototypes. - Supported enterprise customer solutioning across rail, manufacturing, public sector, communications, and consulting by shaping architectures, validating technical approaches, and preparing customer-ready assets. - Delivered customer-facing and event-ready demos for RAG, MCP, Azure App & AI platform, and agentic AI, including events with 50+, 40+, and 30+ participants. - Created reusable field tooling and assets, including PG-contact discovery, IaC demo environments, GitHub templates, and architecture guidance to accelerate solution delivery. - Produced Azure AI architecture guidance on GA vs preview capabilities, governance, MCP/A2A usage, and agent implementation tradeoffs for enterprise decision-making. - Enhanced an enterprise AI agent with FoundryIQ, Content Understanding, Azure AI Search, and realtime voice, translating stakeholder feedback into production-oriented improvements.	
11/2025 – 2/2026	Part-time Frontend Developer	Pickit 3D, Leuven
React, TypeScript, Figma, RAG, Python	- Continued improving Pickit 3D web tooling and customer-facing UX after the internship. - Designed and documented an AI-assisted troubleshooting concept to streamline support workflows.	
7/2025 – 9/2025	Frontend & Cybersecurity Intern	Pickit 3D, Leuven
React, TypeScript, Figma, Python, LDAP, Docker	Owned and modernized Pickit 3D's ThreeJS Camera Selector by redesigning the React/TypeScript UX, improving architecture and performance, and adding dynamic accuracy calculations from official 3D-camera documentation. - Enabled Application Engineers & Sales to deliver faster visual customer guidance, increasing pre-sales engagement and reducing camera-selection support requests. - Led migration from a shared company server to a dedicated LDAP instance with DevOps, deploying a custom Docker container to improve ownership and access control while enforcing TLS/SSL.	

PROJECTS

GHCP, React TS, FastAPI, Azure AI, GraphRAG, Bicep	GraphRAG Demo	github.com/aryxenv/graphrag-demo
	Built customer-facing Microsoft AI Tour demo comparing vanilla RAG vs GraphRAG through a React/Fluent UI interface, FastAPI SSE backend, 3D knowledge-graph explorer, and guided build pipeline powered by Microsoft Foundry , Azure AI Search , GPT-4.1, and Bicep/azd deployment.	
React TS, Vite, Tailwind, FastAPI, Playwright, GHCP	Webslides	github.com/aryxenv/webslides
	Created web-app slide deck framework from a hackathon concept for customer presentation delivery, supporting in-slide demos, interactive navigation, reusable React/Tailwind components, Copilot-assisted theming/authoring skills, GitHub Pages publishing, and local PDF/PowerPoint export via FastAPI and Playwright.	
Python, Bicep, GHCP, Foundry Agents, PostgreSQL, Docker	Hosted Agent RCE Security Demo	github.com/aryxenv/techorama-rce-code-attack
	Engineered secure-vs-unsecure hosted-agent demo showing how prompt injection can abuse custom in-container code execution to bypass sanitized PostgreSQL access and leak fake PII through chart artifacts, then contrasted it with Foundry Code Interpreter sandboxing, managed identity, Bicep/azd infrastructure, and private Blob artifact delivery.	
Python, FastAPI, AKS, MAF, AGT, Docker, Kubernetes	AKS Agent Governance Toolkit	github.com/aryxenv/aks-agent-with-governance-toolkit
	Deployed Microsoft Agent Framework weather agent on AKS with a FastAPI SSE wrapper, lightweight Fluent UI client, Kubernetes manifests, and an Agent Governance Toolkit policy sidecar enforcing deterministic tool controls for Nominatim/Open-Meteo weather lookups.	

EDUCATION

9/2023 – 6/2026	Bachelor's degree, Data Science, Protection & Security	Thomas More University of Applied Sciences
	Maintaining 80%+ total grades and 100% study efficiency. Coursework includes software/web development, AI/ML, data analysis, data science, database management, cybersecurity and finance.	
9/2021 – 6/2023	Secondary school diploma, Marketing & Entrepreneurship	Sint-Ludgardis Antwerpen
	Entrepreneurship-focused education with hands-on learning, developing problem-solving and business management skills.
